

## FOCUS

Providing transdisciplinary R&D and innovation solutions to challenges that matter to Canadians.

## PARTNERS

Canadian Nuclear Safety Commission

Environment and Climate Change Canada

Health Canada

National Research Council of Canada

Natural Resources Canada

# TerraCanada

## OVERVIEW

The TerraCanada innovation and science hub will energize collaboration by establishing a multi-partner network of facilities, with facilities and staff in the National Capital Area and in five other regions. This network will be anchored by modern infrastructure that will attract and retain global talent and promote opportunities for diverse researchers and students, building the next generation of federal science leadership.

## SCIENCE PRIORITIES

### **Sustainable Land and Resource Development:**

developing the economic potential of Canada's land and resources in a sustainable manner.

**Low Carbon Economy:** supporting Canada's transformation to a low carbon economy.

**Safety and Health of Canadians:** generating and sharing knowledge to mitigate the impacts of natural and human-made hazards on the safety and health of Canadians.
